FINAL EXAMINATION

TRIMESTER 2, 2015/2016

BFN 1814 – FINANCIAL MANAGEMENT
(DISTANCE EDUCATION)

4th MARCH 2016
(9.00 a.m – 11.00 a.m)
(2 Hours)

INSTRUCTIONS TO STUDENT

1. This Questions paper consists of six (6) pages with 2 sections *excluding* the cover page, formula and financial tables.
2. **Section A – 20 Multiple Choice Questions (30 marks)**
Instruction: **Answer ALL questions.** Shade your answer in the OMR sheet provided.
3. **Section B – 4 Working Problems (70 Marks)**
Instruction: **Answer ALL questions.** Write your answers in the Answer Booklet provided.

Section A – MULTIPLE CHOICES (30 marks)

There are 20 questions in this section. Answer all questions on the multiple choice answer sheet (1.5 marks each).

1. Zaenm deposited RM1,000 in a savings account that pays 8 percent interest, compounded quarterly, planning to use it to finish his last year in MMU. Eighteen months later, Zaenm decide to go to Sipadan Islam to become a scuba diver instructor rather than continue in school, so he closes out his account. How much money will Zaenm receive?
 - a. RM1,126
 - b. RM1,171
 - c. RM1,082
 - d. RM1,163
2. An annuity with an infinite life is called a(n)
 - a. perpetuity.
 - b. primia.
 - c. indefinite.
 - d. deep discount
3. Sue was evaluating an investment opportunity with equal end of period cash flows, when she realized she would need a 10% return rather than an 8% return. Since the equal expected cash flows did not change, Sue should:
 - a. pay the same amount in present dollars for the investment
 - b. make certain the investment is not an annuity due
 - c. pay less in present dollars for the investment
 - d. try to increase the length of time she will hold the investment
4. A firm has RM5,000,000 of inventory on average and annual sales of RM30,000,000. Assume there are 365 days per year. What is the firm's inventory conversion period?
 - a. 30.25 days
 - b. 60.83 days
 - c. 45.00 days
 - d. 72.44 days
5. A firm has a cash conversion cycle of 80 days, an average collection period of 25 days, and an average age of inventory of 70 days. Its operating cycle is _____ days.
 - a. 95
 - b. 105
 - c. 60
 - d. 130

Continued...

6. The firm's target capital structure is consistent with which of the following?
 - a. Maximum earnings per share (EPS).
 - b. Minimum cost of debt (k_d).
 - c. Minimum cost of equity (k_s).
 - d. Minimum weighted average cost of capital (WACC).
7. When using IRR, NPV, or PI in capital budgeting:
 - a. mutually exclusive projects are always ranked the same
 - b. the time value of money is taken into account
 - c. direct estimates of the increase or decrease in shareholder value can be obtained
 - d. accounting measures of profit are considered
8. According to the CAPM, the lower a security's beta, the _____ its exposure to systematic risk and the _____ its expected return.
 - a. greater; lower
 - b. greater; higher
 - c. lower; lower
 - d. lower; higher
9. Beta is a statistical measure of:
 - a. hyperbolic.
 - b. total risk.
 - c. the standard deviation.
 - d. the relationship between an investment's returns and the market return
10. Changes in the general economy, such as changes in interest rates or tax laws, represent what type of risk?
 - a. Firm-specific risk
 - b. Market risk
 - c. Unsystematic risk
 - d. Diversifiable risk
11. 1/15 net 30 date of invoice translates as
 - a. a 1 percent cash discount may be taken if paid in 15 days; if no cash discount is taken, the balance is due in 30 days after the middle of the month.
 - b. a 1 percent cash discount may be taken if paid in 15 days; if no cash discount is taken, the balance is due 30 days after the invoice date.
 - c. a 1 percent cash discount may be taken if paid in 15 days; if no cash discount is taken, the balance is due 30 days after the end of the month.
 - d. a 1 percent discount may be taken on 15 percent of the purchase if the account is paid within 30 days after the end of the month.

Continued...

12. For capital budgeting purposes, financial analysts focus on _____ inflows and outflows.
- Total cash
 - working capital
 - incremental cash
 - working capital
13. Which of the following is not an advantage of both NPV and IRR?
- incorporates all cash flows that a project generates over its life
 - makes an appropriate adjustment for the time value of money
 - makes adjustments for differences in risk across projects
 - will lead to the correct decision when a project's cash flows alternate between negative and positive values
14. All else equal, the future value of a lump-sum amount invested today will increase if the
- interest rate that is earned is lowered.
 - investment time period is shortened.
 - amount initially invested is lowered.
 - number of compounding periods is increased
15. What is the composition of the nominal rate of interest?
- the real rate plus an inflationary expectation.
 - the real rate plus a risk premium.
 - the risk-free rate plus an inflationary expectation.
 - the risk-free rate plus a risk premium.
16. The _____ is the rate of return a firm must earn on its investments in projects in order to maintain the market value of its stock.
- net present value
 - cost of capital
 - internal rate of return
 - gross profit margin
17. James plans to fund his individual retirement account, beginning today, with 20 annual deposits of RM2,000, which he will continue for the next 20 years. If he can earn an annual compound rate of 8 percent on his deposits, the amount in the account upon retirement will be _____.
- RM19,636
 - RM91,524
 - RM98,846
 - RM21,207

Continued...

18. _____ projects have the same function; the acceptance of one _____ the others from consideration.
- Capital; eliminates
 - Independent; does not eliminate
 - Replacement; does not eliminate
 - Mutually exclusive; eliminates
19. A firm has a beta of 1.2. The market return equals 14 percent and the risk-free rate of return equals 6 percent. The estimated cost of common stock equity is
- 6 percent.
 - 7.2 percent.
 - 15.6 percent.
 - 17.2 percent
20. A firm purchased goods with a purchase price of RM1,000 and credit terms of 1/10 net 30. The firm paid for these goods on the 5th day after the date of sale. The firm must pay _____ for the goods.
- RM990
 - RM900
 - RM1,000
 - RM1,100

Section 2 – SHORT ESSAY QUESTIONS. Answer all questions from this part.

QUESTION 1

- a. A financial analyst covering Magnum Oil has determined the following four possible returns given four different states of the economy over the next period.

Probability	Return
0.10	-0.20
0.25	-0.05
0.40	0.15
0.25	0.30

Based on the above information, calculate the following:

- expected return for Magnum Oil. (5 marks)
- variance for Magnum Oil. (5 marks)
- standard deviation for Magnum Oil. (5 marks)

Continued...

- b. JayJay is a portfolio manager for a large pension fund. Last year his portfolio had an actual return of 12.6% with a standard deviation of 13% and a beta of 1.3. The market risk premium for this period of time was 6% and the risk-free rate of return was 5%.

Based on the Capital Asset Pricing Model (CAPM), what is the required rate of return for this portfolio? (5 marks)

(TOTAL: 20 Marks)

QUESTION 2

BBC Berhad is interested in calculating the cost of capital. In order to calculate the cost of capital, the company has collected the following information:

- The company's capital structure consists of 40% debt and 60% common stock.
- The company has bonds outstanding with 25 years to maturity. The bonds have a 12 percent annual coupon, a face value of RM1,000, and a current price of RM1,000.
- The company uses the CAPM to calculate the cost of common stock. Currently, the risk-free rate is 5 percent and the market risk premium equals 6 percent. The company's common stock has a beta of 1.6.
- The company's tax rate is 40 percent.

Based on the above information,

- i. What is the company's after-tax cost of debt? (7 marks)
- ii. What is the company's cost of common equity? (6 marks)
- iii. Calculate the company's weighted average cost of capital (WACC)? (7 marks)

(TOTAL: 20 Marks)

QUESTION 3

Romanelli Manufacturing is spending RM 115,000 to update its equipment. This is necessary if the firm wishes to be competitive in the marketplace and provide a wide array of product models. The company estimates that these updates will improve its cash inflows by RM 27,500 a year for eight years. The company requires a 14 percent return on the investment.

Continued...

Based on the above information,

- i. What is the payback period? (4 marks)
- ii. What is the Net Present Value (NPV)? (4 marks)
- iii. What is the Profitability Index (PI)? (4 marks)
- iv. What recommendation would you make relative to implementation of the project? Why? (3 marks)

(TOTAL: 15 Marks)

QUESTION 4

- a. Tamminga Corporation uses 360 units of an inventory item each year. The inventory order cost is RM100 per order and carrying costs are RM1 per item per year. Tamminga wishes to maintain a safety stock of 10 days of inventory and it takes the company 5 days to receive an order once it is placed. Assume a 365-day year. Calculate the economic order quantity for Tamminga's inventory item. (6 marks)
- b. Joyah Grocery Store ordered goods totalling RM3,000 every 3 months. The credit term set by the supplier is 2/10 net 30. If it takes the discount offered by the supplier, calculate the savings that can be obtained in a year. Assume that there are 360 days in a year. (4 marks)
- c. TinaTini is 30 years old and is saving for her retirement. She is planning on making 36 contributions to her retirement account of the next 36 years. The first contribution will be made today ($t = 0$) and the final contribution will be made 35 years from today. The retirement account will earn a return of 10 percent a year. If each contribution she makes is RM3,000, how much will be in the retirement account 35 years from now? (5 marks)

(TOTAL: 15 Marks)
